Dear FCC,

I support the petition to require VRS interoperability because I am frustrated with the different ways to call people on videophone.

It makes easier for good customer and same system.

I don't like that my VRS is blocked and sometimes I have to wait.

Everyone does not have to wait for too long.

It is very important to make everyone equally accessible by setting up one system just like the telephone.

Like the telephone public is equally to treat everyone.

The different ways cause stress and can put us at risk. Please make whole video relay service (VRS) equal with same system.

Everyone has cause stress and can put them at risk. It is very important to use the whole video relay service (VRS) equal with same system to same everyone with Hearing customers and Deaf & Hard of Hearing customers to access the same system.

Thank you for this opportunity to make my comment.
